languages

Hungarian (native)

English (B1)

German (during study)

Hi, I am Kellner Béla!

I'm currently working as an administrator, and I do programming as a hobby. My ambition is to become a full-time programmer in the future and become a deeper expert in software development. I enjoy solving challenging problems and always strive for professional development and learning. In my spare time, I am committed to developing myself in the world of IT, with a particular focus on C# programming.

experience

2023 - Present

Security Technician
Büntetés-végrehajtás Gazdasági Ellátó Intézete

I stayed in Sopronkőhida, and my job remained the same. The only difference is that I am now under the management of the BV GEI institute, as all of the departments have been restructured and I have been transferred as a result.

2020 - 2023

Chief Information Technology Lecturer
Sopronkőhidai Fegyház és Börtön

I am responsible for the full management of the IT and security infrastructure, including the programming and operation of Windows domain servers and network devices (cameras, decoders, NAS, switches, and IP phones).
I was also responsible for managing users' Windows and other system privileges, as well as keeping records of IT assets and materials. Deploying and maintaining systems such as a permission request ticketing system (self-created in ASP.NET MVC) and a network management system (Zabbix)

2019 - 2020

Information Technology Lecturer
Sopronkőhidai Fegyház és Börtön

My main task was to fully understand the specific IT infrastructure and install the necessary networking equipment. As well as the inventory of IT tools and materials.

education

2020 - 2021

Professional law enforcement exam
BVOTRK

I completed the basic law enforcement exam.

2019

HikVision IP camera systems
RIEL Elektronikai Kft.

The course covered the installation, configuration, and commissioning of IP-based camera systems.

2017 - 2019

Graphic Designer
Soproni SZC Handler Nándor Szakképző Iskolája

I have successfully mastered the use of popular applications from the Adobe software family, such as Photoshop, InDesign, and Illustrator. I have also deepened my knowledge of print and graphic design, which are essential for the design and implementation of a company's overall image.

2010 - 2016

Webmaster
Soproni SZC Handler Nándor Szakképző Iskolája

In the first year, I studied English in a language preparation programme, and after four years, I passed my A-levels. In addition to my A-level subjects, I also attended vocational courses where I learned the basics of IT system operation. In my final year, I chose the profession of webmaster and obtained a qualification in this field.
